always welcome!

How to use a defibrillator

Defibrillators are very easy to use. Although they don't all look the same, they all function in broadly the same way.

If you come across someone who is not breathing or breathing erratically, the most important thing is to call 999 and start CPR. If you're on your own, don't interrupt the CPR to go and get a defibrillator. When you can, send someone else to find one.

Once the defibrillator is open, all you have to do is follow the spoken instructions.
